

Decreasing:

To decrease on the right side of the loom or rake we move the loop on the peg on the right, to the peg on the left of it. I like to move the 3rd. peg to the 4th. Peg, this leaves a nice slanted edge; especially if working with garter stitch or for ranglan style sleeves.

3rd. pegs moves to 4th peg

now that peg has 2 loops

Move the peg on the second peg to the 3rd.
peg to the 2nd.

Move the peg on the first
peg to the 2nd.

Wrap as usual and when you encounter a peg with 2 loops knit 2 over 1.

For the left side decreases will be the same just moving to the right. So you always move to the center of the work.
